

## Sound-Sensor

Sound-Sensor

Sensitivity Control Potentiometer Sound Detection Sensor Module Sound Sensor car  
Features:

100% Brand new and high quality

Size: About 32mm\*17mm\*15mm(length\*width\*height)

Main Chip: LM393, Electret condenser microphone

Working Voltage: DC 4-6V

Signal output indication

Single channel signal output

The output effective signal is low level

When there is sound,output low level and the signal lights

Can be used for Acoustic control light; give sound and light alarm working with  
Photosensitive sensor

Note:The Maximum induction distance is 0.5M

Package Included:

1 x Sensitivity Control Potentiometer Sound Detection Sensor Module Sound Sensor car
