

# USB-RS485-1

Size: 15.5 \* 16 \* 15.5 mm

The module features:

- 1, 2 channels of logic and high voltage low voltage logic two-way transformation
- 2, 2 channels of high voltage logic into a low voltage logic of one-way conversion
- 3, small module, 1.5 cm X 1.5 cm
- 4, module compatible with bread plate, can be used directly put on the bread board

Instructions: the high voltage of 5 V low voltage of 3.3 V, for example)

HV connect 5 v power supply

LV 3.3 V power supply

GND connect power anode, both the power of the Commons

5 v TTL RXI input, will be in 3.3 v TTL RXO output

TXI input and output of 3.3 V TTL, TXO input/output 5 V TTL, TXI and TXO bidirectional transfers
