

μA776 Multi-Purpose Programmable Operational Amplifier

Linear Division Operational Amplifiers

Description

The μA776 Programmable Operational Amplifier is constructed using the Fairchild Planar Epitaxial process. High input impedance, low supply currents, and low input noise over a wide range of operating supply voltages coupled with programmable electrical characteristics result in an extremely versatile amplifier for use in high accuracy, low power consumption analog applications. Input noise voltage and current, power consumption, and input current can be optimized by a single resistor or current source that sets the chip quiescent current for nano watt power consumption or for characteristics similar to the μA741. Internal frequency compensation, absence of latch up, high slew rate and short circuit current protection assure ease of use in long time integrators, active filters, and sample and hold circuits.

- **Micropower Consumption**
- **± 1.2 V To ± 18 V Operation**
- **No Frequency Compensation Required**
- **Low Input Bias Currents**
- **Wide Programming Range**
- **High Slew Rate**
- **Low Noise**
- **Short Circuit Protection**
- **Offset Null Capability**
- **No Latch Up**

Absolute Maximum Ratings

Storage Temperature Range

Metal Can	-65°C to +175°C
Molded DIP	-65°C to +150°C

Operating Temperature Range

Extended (μA776M)	-55°C to +125°C
Commercial (μA776C)	0°C to +70°C

Lead Temperature

Metal Can (soldering, 60 s)	300°C
Molded DIP (soldering, 10 s)	265°C

Internal Power Dissipation^{1, 2}

8L-Metal Can	1.00 W
8L-Molded DIP	0.93 W

Supply Voltage

± 18 V

Differential Input Voltage

± 30 V

Input Voltage³

± 15 V

Voltage Between Offset Null and V-

± 0.5 V

Output Short Circuit Duration⁴

Indefinite

I_{SET} (Maximum Current at I_{SET})

500 μA

V_{SET} (Maximum Voltage to

(V+ -2.0 V)

Ground at I_{SET}) ≤ V_{SET} ≤ V+

Notes

1. T_{J Max} = 150°C for the Molded DIP, and 175°C for the Metal Can.
2. Ratings apply to ambient temperature at 25°C. Above this temperature, derate the 8L-Metal Can at 6.7 mW/°C, and the 8L-Molded DIP at 7.5 mW/°C.

Connection Diagram 8-Lead Metal Package (Top View)

CD00631F

Lead 4 connected to case.

Order Information

Device Code	Package Code	Package Description
μA776HM	5W	Metal
μA776HC	5W	Metal

Connection Diagram 8-Lead DIP (Top View)

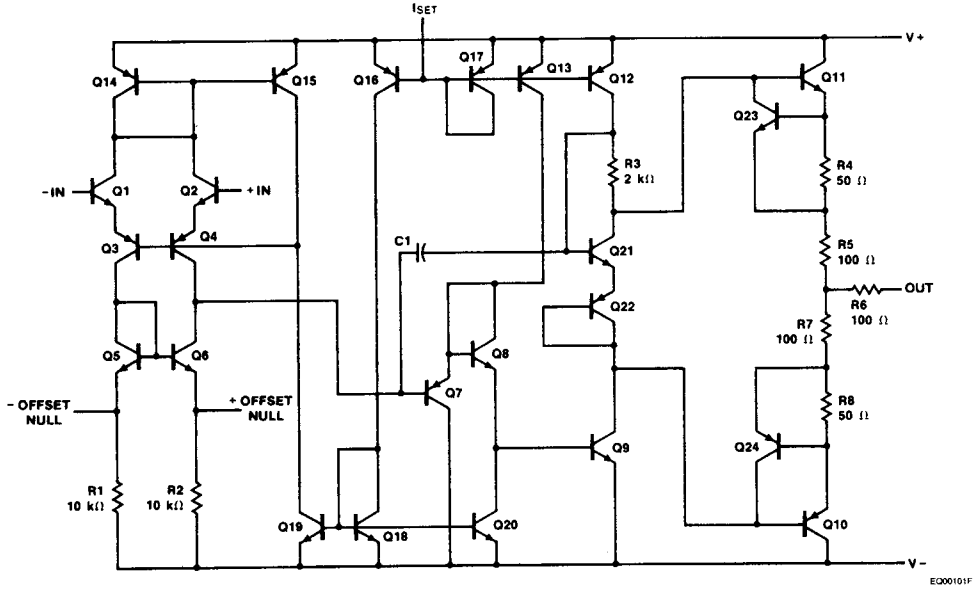

CD00641F

Order Information

Device Code	Package Code	Package Description
μA776TC	9T	Molded DIP

3. For supply voltages less than ± 15 V, the absolute maximum input voltage is equal to the supply voltage.
4. Short Circuit may be to ground or either supply. Rating applies to 125°C case temperature or 75°C ambient temperature for I_{SET} ≤ 30 μA.
