

# SH-713 Electronic Mechanical Counter

## Description:

SH series of quartz-enclosed electronic timer, innovative structure, size, high accuracy, reliable performance, long life and adapt to the environment - and low prices, user-friendly. It is most appropriate for Standard Industrial timing, is widely used in engineering machinery, construction vehicles, farm machinery, generators, kilns, pumps, traffic, cranes, cars and other types of fees and the actual working hours of tracking and monitoring the performance of sophisticated equipment maintenance cycles to provide scientific basis.

## Technical parameters:

Timing range	99999.9
Accumulated timing precision	±0.01
Use of environmental temperature	-10 C° - +50 C°
Powder	0.3W
In Zhen range	10-70HZ 1-8g
Relative Humidity	All sealed
Returntozero	no
Power voltage	6~80VAC/DC?90~130VAC?180~240V AC

## Mounting Size
